

DISCIPLINES:
CIVIL ENGINEERING

KEY SERVICES

> SITE DESIGN

LJB's experienced professionals protect the interests of owners and developers by helping them make the best decisions up front to benefit the long-term health of the project.

> INFRASTRUCTURE

Successful infrastructure is the foundation for successful communities, institutions and businesses. At LJB, we strive to provide innovative infrastructure solutions that are invisible by design.

At LJB, we strive to provide innovative solutions that are invisible by design. With facilities constantly expanding, our civil engineers are more important than ever.

Whether it's designing a site for a new facility, expanding existing infrastructure or improving an area roadway, LJB can provide a solution that meets your needs.

We understand that a facility isn't complete until adequate utilities and infrastructure are in place, and we are always trying to find better, faster, cheaper ways to make it happen. We know time equals money and we provide functional answers to infrastructure challenges while keeping your project on schedule.
