

KEY SERVICES:

DECOMMISSIONING

WHO WE SERVE

> INDUSTRIAL

Although process drives industry, it's people who are behind the scenes making processes work. LJB understands this dynamic and the unique, fast pace of industrial facilities.

> PUBLIC

From improving a roadway, bridge or water line to designing a new community park or municipal building, LJB is focused on improving communities.

> FEDERAL

Our team is purposefully diverse and flexible to meet the ever-changing needs of federal clients.

The proper decommissioning of facilities can be a complicated process, requiring adherence to a variety of regulations and laws. A mishap in addressing environmental, health and safety concerns can lead to negative financial and legal ramifications and may result in poor public perception of the organization.

LJB's expertise in facility decommissioning will assist you in properly navigating the process, ensuring that the appropriate precautions are performed.

We recognize that proper decommissioning is critical to the success of an organization's future plans for the site or property. Our diverse staff will guide you through the initial investigation, design, necessary decontamination and/or demolition, project closeout and redevelopment.
