ENVIRONMENTAL ENGINEERING

Increasing capacity, expanding service and improving water quality are challenges constantly facing growing communities and businesses.

At LJB, we know that there are no off-the-shelf solutions for environmental engineering. Each project comes with unique challenges and we continuously seek innovative answers to everyday problems.

LJB provides a variety of services including master planning, design and construction support to decrease pressure on existing public infrastructure. From water and wastewater facilities to stormwater, water and wastewater infrastructure, LJB has the water resource solution for you.
