Our team is purposefully diverse and flexible to meet the ever-changing needs of federal clients.

We understand the importance of providing innovative solutions to unique challenges in a timely and cost-effective manner. And, we understand that the U.S. government has one of the most important jobs—to protect our people. With experience in anti-terrorism and force protection standards, composites and fall protection systems, LJB continuously seeks innovative ways to keep people safe.

LJB has experience in a wide variety of projects for civilian and military installations, including fall protection, runway extensions, guard houses, landfill mapping and field sampling, water storage tanks, sanitary sewer systems and transportation studies.
