

KEY SERVICES:

FORCE PROTECTION

MARKET SEGMENTS

- > U.S. Army Corps of Engineers
- > Department of Defense
- > Correctional facilities
- > Design-build contractors

LJB has extensive experience with government force protection requirements and maintains a leadership role within the concrete industry.

Although force protection has become a more common term in the building industry since the terrorist acts of 9/11, LJB incorporated this standard into facility design prior to that tragic day.

LJB strives to find the most efficient methods to achieve security and force protection for military facilities through the innovative use of concrete materials. Our extensive experience with these requirements resulted in our selection to a joint task force between the Department of Defense and concrete industry leaders. Our involvement on this task force keeps LJB abreast of the latest developments in designing facilities for enhanced security.

MARKETS SERVED

> FEDERAL

Our team is purposefully diverse and flexible to meet the ever-changing needs of federal clients.

> TRANSPORTATION

At LJB, we're in the business of moving people. We provide innovative infrastructure design solutions to meet today's needs and tomorrow's demands.

> PUBLIC WORKS

From improving a roadway, bridge or water line to designing a new community park or municipal building, LJB is focused on improving communities.
