

KEY SERVICES:

# PUBLIC FACILITIES

## WHO WE SERVE

### > MUNICIPALITIES

We understand the challenges municipalities face every day and each project comes with its own deadlines and budget constraints.

### > COUNTIES

We know counties are looking to consistently provide quality public facilities and infrastructure on time and within budget.

### > PARKS AND RECREATION

We strive to provide exceptional parks and recreation that promote health and wellness, preserve natural areas and provide quality outdoor activities for families and friends.

As populations grow, public entities often find their facilities need improvement. Whether developing new space or enhancing existing facilities, there is often a long wish list and a moderate budget.

You can trust LJB to provide outstanding value because we understand that there is no room for error when public money is involved.

We understand that designing successful public facilities involves a delicate balance between adhering to budget and schedule while creating spaces that the community and its citizens can be proud of for years to come.

We suggest innovative and functional designs that create the necessary elements of a municipality that its people are proud to call home.
