TRANSPORTATION

At LJB, we're in the business of moving people. We provide innovative infrastructure design solutions to meet today's needs and tomorrow's demands.

PUBLIC WORKS

From improving a roadway, bridge or water line to designing a new community park or municipal building, LJB is focused on improving communities.

Improving public infrastructure often requires the purchase of additional property or right of way. At LJB, our professionals provide design alternatives that minimize the impact to private property.

We know that the residents, business owners and stakeholders value their property and we continually seek ways to avoid impacting their homes, businesses and property while still meeting the needs of the client.

If the project requires acquisition of property, we approach the project from the perspective of the property owner. We are sensitive to their concerns and work toward an agreement that is fair to all parties involved.

WHO WE SERVE

> DEPARTMENT OF TRANSPORTATION

A successful transportation project not only meets current demands, but also provides solutions that will accommodate growth and future demands.

> COUNTIES

Every county has one goal in mind—keep traffic moving smoothly and safely while being fiscally responsible. At LJB, we understand this goal and consistently provide quality public infrastructure on time and within budget.

> MUNICIPALITIES

We understand the challenges municipalities face every day and each project comes with its own deadlines and budget constraints.

> PARKS AND RECREATION

We strive to provide exceptional parks and recreation that promote health and wellness, preserve natural areas and provide quality outdoor activities for families and friends.
