

KEY SERVICES:
ROADWAY

WHO WE SERVE

CLIENTS INCLUDE

- › Municipalities
- › County agencies
- › Department of Transportation
- › Department of Defense
- › Developers
- › Institutions

Increasing populations and traffic are constantly deteriorating roadways and highways. At LJB, we have the capacity to tackle roadway projects—large or small—in tight time frames.

We understand the importance of ‘constructable’ design and strive to provide innovative and cost effective solutions that are compatible with the communities they serve.

LJB has completed both geometric and structural design on roadway projects, including interstates, state highways, rural county roads, urban multi-lane streets, service roads and bikepaths. Our designs have included new alignments, widening, reconstruction, intersection improvements and resurfacing.

We are unique in our experience with complex intersection design (continuous flow intersections and roundabouts) and our experience with new service interchanges (more than 15 interchanges in the last 20 years). LJB can provide the solution that meets your needs while maintaining the schedule, budget and aesthetics you want.

SERVICES

- › WIDENING AND RESURFACING
- › INTERSTATE AND INTERCHANGE DESIGN AND RECONSTRUCTION
- › INTERSECTION DESIGN AND GEOMETRICS
- › DRAINAGE AND HYDRAULIC DESIGN
- › RIGHT-OF-WAY DESIGN
- › MAINTENANCE OF TRAFFIC
- › UTILITY COORDINATION, DESIGN AND RELOCATION
- › TRAFFIC FLOW/GEOMETRIC ANALYSIS
- › SURVEY
- › FUNDING APPLICATIONS
