

KEY SERVICES:

WEB-BASED INFRASTRUCTURE ASSET MANAGEMENT

WHY WEB-BASED INFRASTRUCTURE ASSET MANAGEMENT?

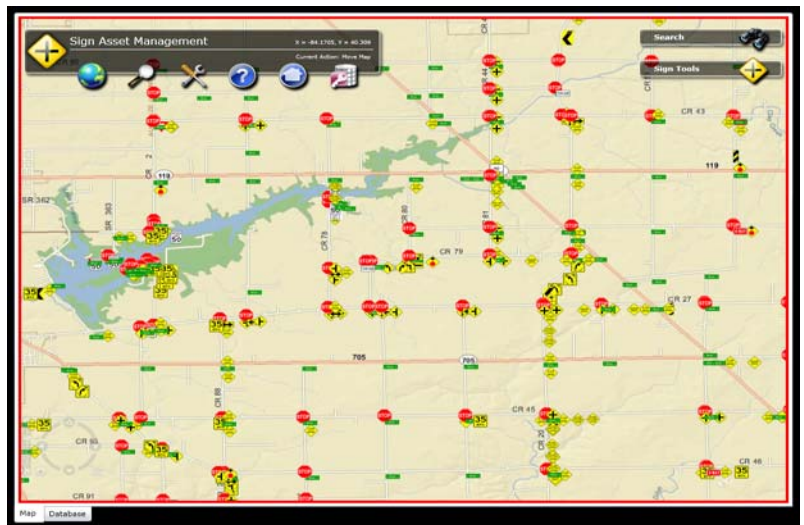

Benefits of managing infrastructure assets using this platform include:

- > EPA outfall compliance
- > FHWA sign reflectivity compliance
- > Online access from the office or in the field
- > No expensive software or hardware to purchase
- > Centralized data storage and backup
- > Asset and maintenance management
- > Prioritize improvements
- > View/create/track work orders
- > Simultaneously access data from multiple locations
- > Update data in real time
- > Graphically view/edit asset data

A better system for smarter, more cost-effective asset management that is easy to use and maintain accurate data

LJB Inc. provides a cost-effective web-based system for managing infrastructure assets by leveraging geographic information systems (GIS) technologies. Multiple users can access and update the system anywhere, anytime without expensive GIS software licenses on each computer.

LJB Inc. can customize your system to collect and manage as much data as you need based on your budget. You can graphically view asset data, detailed maps, photos and plan sheets and can instantly print work orders for maintenance tasks.

WHAT CAN YOU MANAGE?
