

Improving the quality of life

AIA CONTINUING EDUCATION PRESENTATIONS

LJB Inc. is certified by the American Institute of Architects (AIA) to offer workshops and sessions that qualify as required learning units (LUs) for registered architects. Our sessions are one-hour in-class presentations given by experienced practitioners.

Tilt-Up Construction: Process, Application and Trends

This presentation covers the key steps in the tilt-up construction process and identifies current trends including sustainability and building size variation.

Evolution of Multi-Story Tilt-Up

With innovations in design and advancements in construction products, tilt-up is now an effective solution for sophisticated multi-story buildings. This presentation conveys the evolution of tilt-up design and illustrates the heights and aesthetics that can be achieved.

Fall Protection Myths and Facts

The practice of fall protection is plagued by misconceptions and misinformation. This presentation tests your fall protection knowledge by discussing some commonly misunderstood fall protection concepts.

Top 5 Ways to Reduce Fall Hazard Risks

Based on LJB's 20-year history in the industry, this presentation outlines the top five ways to reduce fall hazard risk, providing rationale and examples.

Facility Fall Protection: Roof and Façade Maintenance

This session will provide an overview of common fall hazards related to roof and façade maintenance, as well as potential abatement strategies.

Unique Design Challenges for Facility Fall Protection

Implementing appropriate fall protection solutions is challenging for facilities with aesthetic or historic significance. This session profiles several facility fall protection challenges and the selected safety solutions.

Prevention through Design: Saving Money and Lives

Using case studies, this session examines the process and benefits of implementing safety during the design phase of a project.
