

LJB Inc.

WE THINK BIGGER.

Founded in 1966, LJB Inc. is a national engineering firm driven to think bigger. Licensed in all 50 states; Washington, D.C.; and several U.S. territories and Canadian provinces, we diligently execute ideal solutions alongside public and private owners and their builders responsible for land, the environment and infrastructure: roads, bridges, buildings, utilities and engineered safety systems. At LJB, our diverse services enable us to quickly assemble teams with the right expertise, streamlining your professional services sourcing.

CIVIL / SITE ENGINEERING

Developing and maintaining proper infrastructure is a foundation for successful communities, institutions and businesses. The diverse and experienced design experts at LJB provide innovative infrastructure solutions that are invisible by design.

ENVIRONMENT + HEALTH

Concern over the quality of our environment is ongoing and increasing. Our integrated team monitors and implements environmental rules to facilitate compliance and sustainability.

GEOSPATIAL / SURVEY

Our team leverages the latest technology applications to support data collection, construction layout and construction services. We integrate traditional and UAS survey, photogrammetry, GIS, and terrestrial, mobile, and airborne LiDAR into turnkey solutions for project planning, management, and implementation.

SAFETY / FALL PROTECTION

LJB has a passion for improving safety for workers and reducing risk for organizations. Our team can address a variety of occupational safety concerns, and we have unmatched experience and expertise in fall prevention and protection.

STRUCTURAL ENGINEERING

Recognized for our ability to develop innovative solutions, LJB understands the importance of constructible, economical and sustainable designs, and we strive to provide original and cost-effective solutions.

TRANSPORTATION

Our transportation services focus on improving the safety and efficiency of the traveling public, and we have the experience and expertise to design solutions that meet today's needs and tomorrow's demands.

TRAINING

LJB University is your source for engaging customized business and fall protection training programs that enable you to immediately be better at what you do.

WATER RESOURCES

Our water resources team is recognized for providing innovative water, wastewater and stormwater solutions and for its understanding of the intricacies of federal, state and local project implementation processes to keep projects on schedule.

Markets We Serve

LJB projects are located worldwide, and we serve clients in six primary markets. Clients go out of their way to work with us again, because they trust what we do, and they enjoy working with us. They know we've done good work before, and we'll do it again.
