

# Pandemic Preparedness

Pandemic events apply extraordinary and unrelenting stress on organizations, operations, and the health and safety of individuals. Leverage our experience and expertise to create and implement the proactive organizational, health, and safety infrastructure for anticipating changes and challenges and navigating the road ahead.

## Services overview:

### Customized continuity of operations plan (COOP)

- Procedures to restart, resume, and sustain operations
- Identify all critical functions, relationships & resources
- Identify essential employee health and safety controls
- Perform gap analysis of existing plans/procedures
- Establish communication protocols

### Design and implement controls

- Maximize engineering and administrative controls that do not rely on Personal Protective Equipment
  - Examples: barriers, air flow, communications, training, signage, alternate work practices, visitor interface protocols, functional protocols & procedures, screening programs, etc.
- Develop the critical Administrative Controls and training for situations when PPE is unavoidable.

## Why LJB?:

Our expertise gives businesses the experience needed to act strategically now, and as this pandemic transforms over the coming months and years. By leveraging LJB's team you will save valuable time and resources, while avoiding the high stakes consequences of reactive or trial-and-error approaches.

### Col. Kirk Phillips (Retired)

- Ran global EHS for U.S. Air Force and led a team of 1,900
  - Led pandemic planning, as advisor to Surgeon General
  - Wrote Continuity of Operations and Pandemic Response Plan for HQ
- 28 years of service to the U.S. Air Force (Retired Colonel)
- Leads nationally recognized engineering practice serving all markets and industries

### SMSgt Dawn Colombi (Retired)

- Led State-Level Responses to Pandemic Planning and Policy Development
- Managed Air National Guard Occupational and Environmental Health Programs
  - Execution responsibilities included 93 installations in 54 states and territories
- 32 years with U.S. Air Force and Air National Guard
- While at OSHA, trained Compliance Safety and Health Officers
- Our team is unique in that we have the practical experience implementing controls—including complete engineering design, and turnkey design and build solutions.
- Diverse industry and market experience, including maintenance, facilities, healthcare, laboratories, production, logistics, material handling, infrastructure, food service, and hospitality.
