

WELL Health-Safety Rating: K-12

LJB can guide your organization through the WELL Health-Safety certification process.

- Third-party verified
- Based on evidence
- Nationally recognized
- Developed by 600 experts
- Establishes a baseline
- Achieves long-term organizational resiliency
- Addresses COVID-19 and future health & safety challenges

The WELL seal outside means you can feel safer inside.

Secure your future: achieve safe & healthy spaces

We have all felt the disruption to the educational process due to the COVID-19 pandemic. Quality health and safety measures influence:

Academic achievement

- Create safe and healthy spaces that allow traditional in-person instruction and delivery of services

Facility management

- Make wise use of your allotted facility and safety funding and align it with your long-term facility enhancement

Community confidence

- Showcase your commitment to the wellbeing of the community through execution of optimal policies and procedures

Key components to achieve your health & safety goals:

Stakeholder Engagement

Emergency Preparedness

Air & Water Quality

Cleaning & Sanitization

Health Services Resources
